

ADVICES FOR THE STUDENTS

#1

You should use the traduction searching for one or two words ; because the real traduction is in the mind.

#2

It is important to respect everyone in the school, you shouldn't make difference between the others

#3

You can ask a lot of questions and you shouldn't be shy.

#4

You have to memorize the numbers of your classes and the number of the stage because the school is very huge.

#5

The french language is not easy for the students who don't work so you should work , listen and write to learn

ADVICES FOR THE Students

You can't give up from the first time, you should be determined, you shouldn't say that it is not possible I can't work it is very hard, it's better to concentrate and by the time you will learn easily, nothing can come fastly.

At night when you arrive to your home, after you rest a little bit you open your bag and revise what did you get during the day.

It's better to listen to your teacher, and you should do what she or he tells you.

You should be present in all french classes, because if you are not present you will not learn the language.
